**DID YOU KNOW ?**

**POLLUTION** | creates free radicals and weakens the "skin barrier" function; skin gets drier and more sensitive.

**DAYLIGHT** | causes cell damage and is involved in breaking down collagen network; skin gets thinner, elasticity is lost, wrinkles & discoloration set in on the skin.

**COMPUTER WAVES** | Exposure to computer waves causes the production of free-radicals, contributing to the acceleration of the aging process and oxidative stress.

**LACK OF SLEEP** | slows down cell renewal process, repercussions to the skin are visible: dark circles, dull and tired looking skin.

**OZONE** | has damaging effects on the skin, depleting antioxidants, leading to a cascade of negative effects for the skin and cell-damage.

**INFRARED RAYS** | amplify UV injury, contribute to skin aging and deactivate some repairing process in the cells.

**DERMATOLOGICAL TEST AND SELF-ASSESSMENT**  
**WORK LIFE** [exposure to computers, cell phones, car-mechanics, indoor light, air conditioning, etc.]  
**CITY LIFE** [skin exposure to smogging, open air, working outside, long work commutes, LAX, LAS, infrared rays, heavy metals, weather changes, etc.]  
**HOUSE LIFE** [exposure to solvents, microwave ovens, carpet, lack of sleep, etc.]  
**EXTREME LIFE** [skin exposure to stress factors (sun, tight accessories, handwear, etc.)]
