COLLAGEN REDUCTION WITH AGE AND PORE SAGGING

WITH AGE, COLLAGEN PRODUCTION SLOWS DOWN, SKIN LOSES ITS SUPPORT AND THE STRUCTURE THAT MAINTAINS THE PORES. THE SKIN ALSO BECOMES WEAKER.

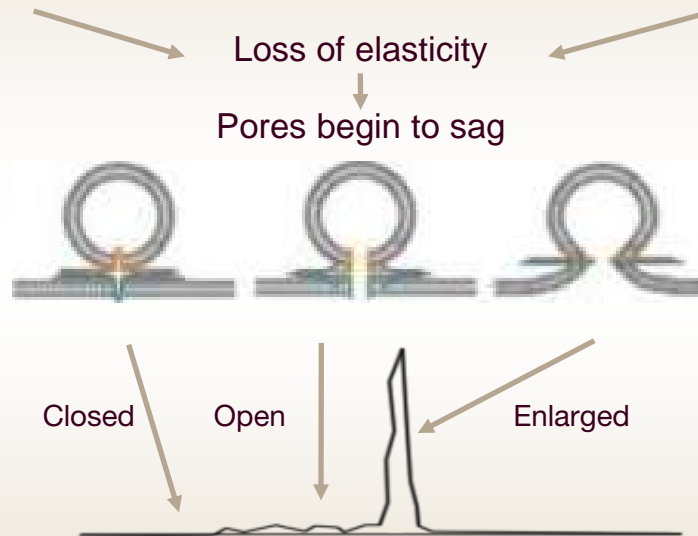

PORES BECOME DEEPER AND WIDER.

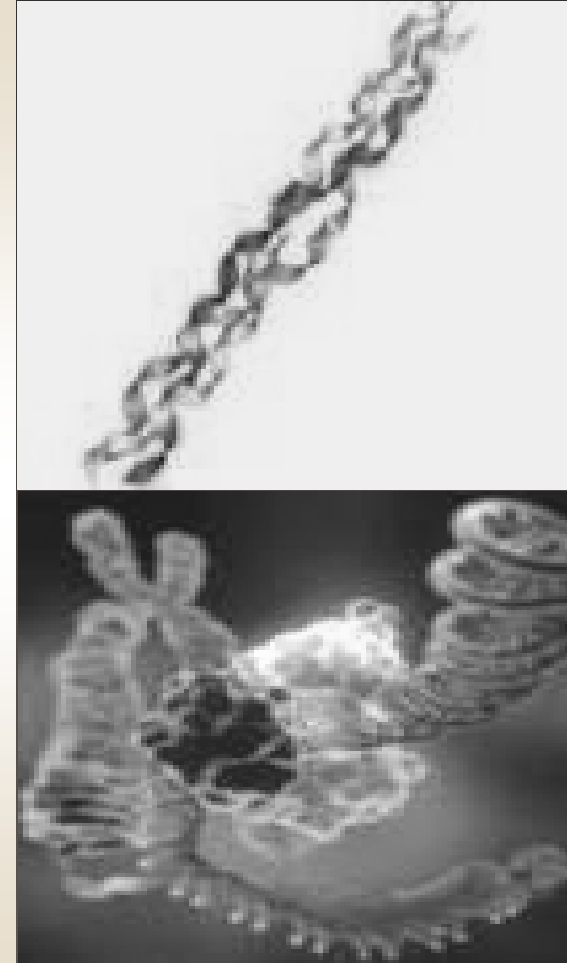

WITH AGE...

Weaker collagen and elastin
production

Increase in the production
of destructive enzymes

The pores on the face are visible and dilated.
The skin looks shiny.

THE DISCOVERY OF A NEW
PORE REFINING
COLLAGEN EFFECT

REINFORCING SKIN STRUCTURE TO “LIFT” PORES

① LAMINARIA ALGAE EXTRACT

> *Reinforces collagen fibers to provide pores with support and make them less visible*

+

② PORETIGHT SOLUTION SILICA+ SALICYLIC ACID

> *Participate in reducing pore visibility*

*In-vitro test

VISIBLE SKIN-PERFECTING EFFECT LIKE A “PHOTO TOUCH-UP”

- ➊ Instantly, the skin reveals its “ultra-smoothness” and mattiness **as if under the effect of a high-definition “photo touch-up”**. Pores are tightened and less visible.
- ➋ Day after day, the skin becomes better toned, its texture refined and smoothed. It feels softer and the “skin perfection” effect is visible.
