### DID YOU KNOW ?

**POLLUTION** | creates free radicals and weakens the "skin barrier" function: skin gets drier and more sensitive.

**COMPUTER WAVES** | Exposure to computer waves creates the production of free-radicals, contributing to the acceleration of the ageing process and oxidative stress.

**DAYLIGHT\*** | causes cell damage and is involved in breaking down collagen network: skin gets thinner, elasticity is lost, wrinkles & discoloration set on the skin.

\*UV rays, visible light and infra rays

**LACK OF SLEEP** | slows down cell renewal process, repercussions to the skin are visible: dark circles, dull and tired looking skin.

#### Dermatological test and self-assessment

**WORK LIFE** | exposure to computers, cell phones, confined spaces, indoor light, air conditioning, etc.

**CITY LIFE** | often exposure to smoking, open air, working outside, long work commutes, UVA, UVB, Infrared rays, heavy metals, weather changes, etc.

**HOUSE LIFE** | exposure to solvents, microwave ovens, sprays, lack of sleep, etc.

**EXTREME LIFE** | over-exposure to stress factors (ex: flight attendants, hairdressers, etc.)

**OZONE** | has damaging effects on the skin: depleting antioxidants, leading to a cascade of negative effects for the skin and cell damages.

**INFRARED RAYS** | amplify UV injury, contribute to skin ageing and deactivate some repairing process in the cells.
